

Website & Data Security of SOTA

STATE OF THE ARTZ

An

Unparalleled

ART

Experience

Be it awesome canvas artwork, or your web/data security, SOTA has you covered! Our website has a crazy **256-bit encryption algorithm** running in its veins, providing you an added layer of security; to ensure your identity & data are invisible to the outside world, including us!

SOTA's site is powered by the robust **Google Cloud Platform** technologies; meaning, the only way that you get hacked, is if both SOTA & Google get hacked – and that's never going to happen! Now, that's a real **state of the art** web & user-data security!

At SOTA, we only sell art; we don't sell your data, we use only basic data to provide you the best art experience. See our [Privacy Policies](#) for more info.

Now, let's get back to **shopping** for **awesome art** at SOTA? ♡
